vidal technologies

WHO WE ARE

Technology applied to real results

Vidal Technologies builds solutions that combine Artificial Intelligence, process automation and systems integration to help companies work more efficiently.

We bring together software architecture, technical expertise and business vision to create practical solutions tailored to the needs of each operation.

Our goal is to turn complex processes into simpler workflows, reduce manual work and use technology to deliver results.

- AI agents and LLM applications
- RAG solutions with your documents
- Workflow automation
- API integrations
- Custom websites and applications

SERVICE CATALOG

Three areas, one complete solution

01

Websites

Fast, good-looking websites that are easy to update and earn your customers' trust.

- Company website
- Website for professionals
- Landing pages
- Blog and portfolio

02

Web applications

Custom systems that organize your company's day-to-day work.

- Management systems
- Data dashboards
- Customer portal
- Scheduling and quotes

03

Automation and AI Agents

Process automation, intelligent agents and AI applied to your business.

- Task automation
- AI agents
- n8n workflows
- Documents and reports

CATALOG · 01

Websites

Your company well presented online: a fast, good-looking website that is easy to update, builds trust and turns visitors into leads.

IDEAL FOR

Companies, independent professionals and brands that want a professional online presence or to promote a campaign.

S1

Company website

Presents your company, services and strengths, with direct contact via WhatsApp.

- Service pages
- About and contact
- WhatsApp button

S2

Website for professionals

An online presence for the self-employed who want to be found.

- Profile and services
- Testimonials
- Book a call

S3

Landing page

A single, focused page for a campaign, product or event, built to convert.

- Lead capture form
- Ready for ads
- Traffic metrics

S4

Blog and portfolio

A space to publish content and showcase your work, always up to date.

- Easy publishing
- Work gallery
- Optimized for Google

On every website Mobile version, fast loading, basic SEO and the option of more than one language.

CATALOG · 02

Web applications

Systems built around the way your company works, instead of scattered spreadsheets and manual processes.

IDEAL FOR

Companies that need to organize records, orders, customers and KPIs in one place.

A1

Management system

Day-to-day control of your company in a tool built for your process.

- Records
- Orders and inventory
- User permissions

A2

Data dashboard

Your business numbers gathered in clear dashboards so you can decide quickly.

- KPIs
- Charts and filters
- Data from multiple systems

A3

Customer portal

A members area where your customers track orders, documents and information.

- Secure login
- Documents
- Real-time status

A4

Scheduling and quotes

Online scheduling, quotes and sign-ups, without endless back-and-forth messages.

- Online booking
- Automatic quotes
- Forms

In every application Tailor-made, secure database, works on desktop and mobile.

CATALOG · 03

Automation and AI Agents

Processes that run on their own and intelligent agents that carry out and analyze tasks, freeing your team for what matters.

IDEAL FOR

Companies with repetitive tasks, high support volume or information spread across several systems.

I1

Task automation

No more manual, repetitive tasks: fewer errors and more free time.

- Spreadsheets and e-mails
- Records
- Notifications

I2

AI agents

Agents that serve, reply, classify and analyze, including on WhatsApp.

- Customer service
- Knowledge base
- Data analysis

I3

Workflows and integrations

Custom n8n workflows that connect the systems you already use.

- n8n
- API integrations
- CRM and ERP

I4

Documents and reports

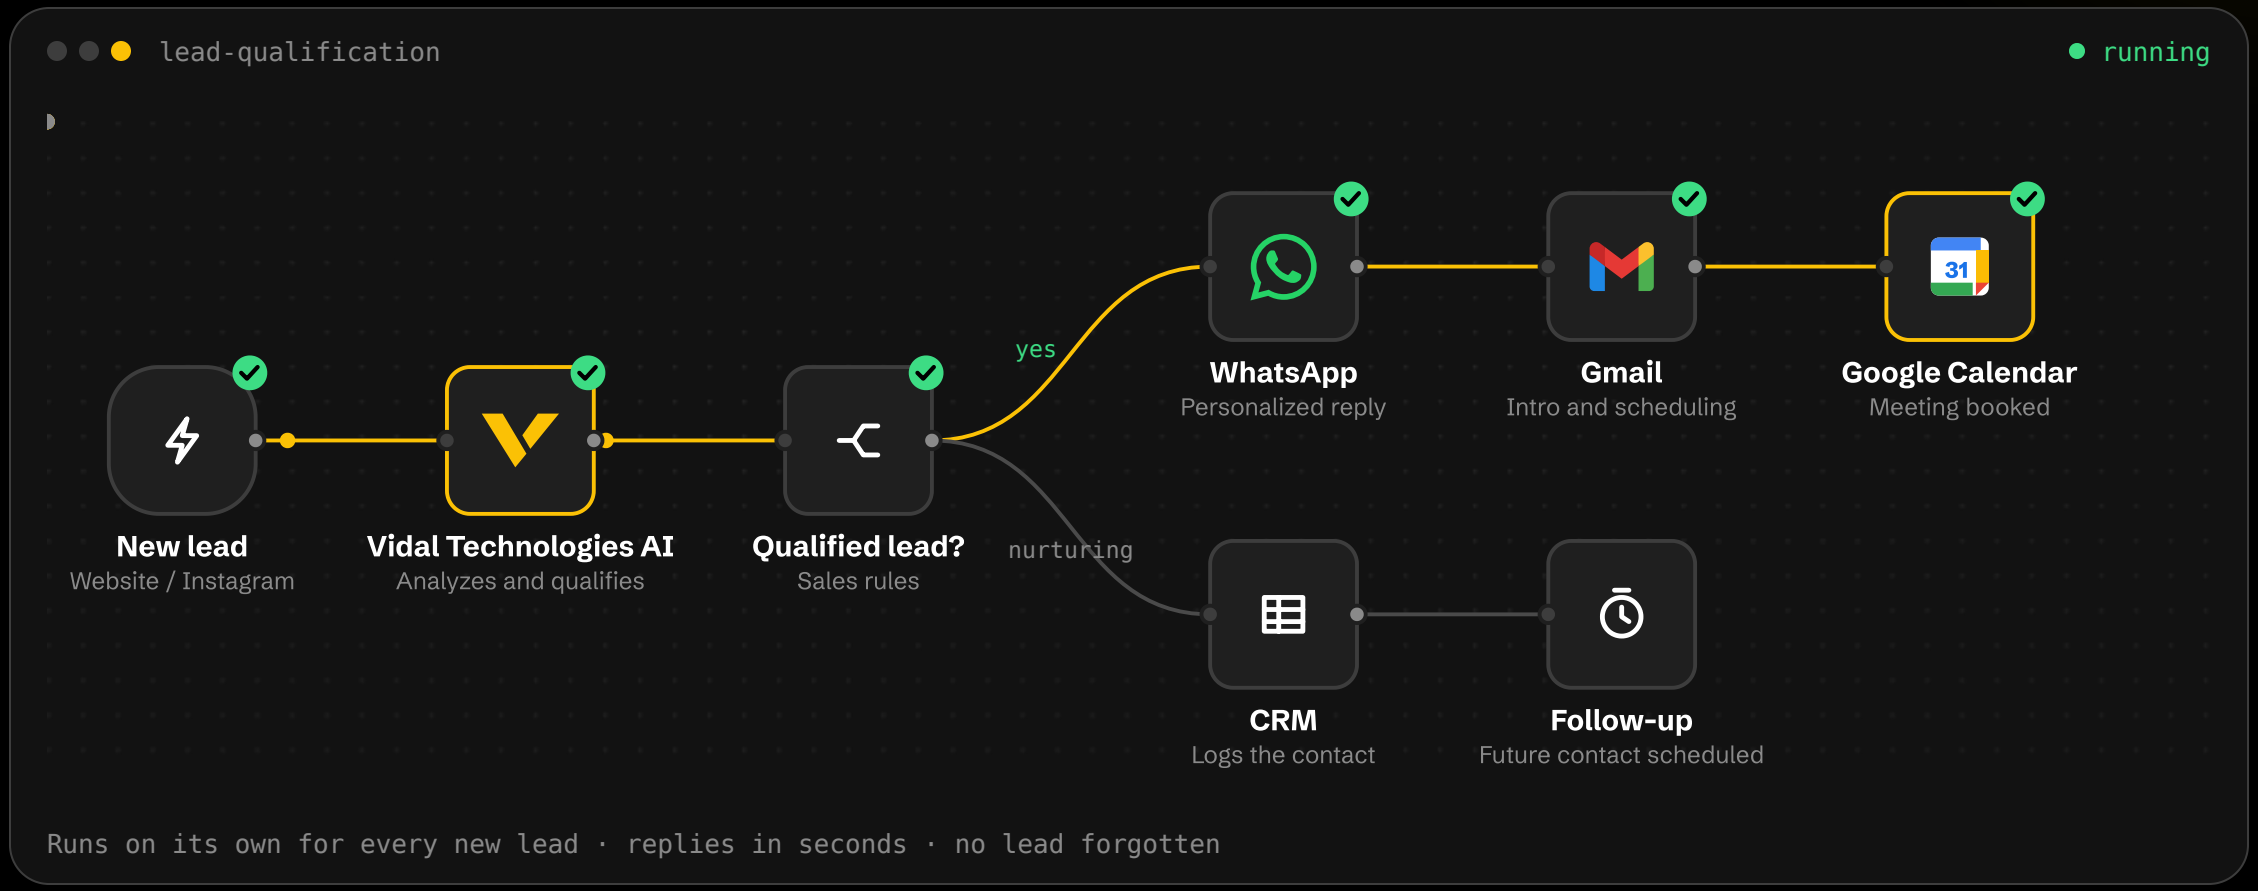

Documents, reports and project tracking generated and sent automatically.

- Weekly reports
- Contracts and proposals
- Project management

In every automation Monitoring and continuous improvement to keep everything running smoothly.

IN PRACTICE · LEAD QUALIFICATION

A new lead comes in. The rest happens on its own.

SOLUTION EXAMPLES

Some examples of what we build

Multilingual company website

Fast website in Portuguese, English and Spanish, with an animated flow and WhatsApp contact.

Next.js · TypeScript · Tailwind

WhatsApp support agent

AI agent that answers customers, qualifies requests and logs everything in the CRM.

n8n · LLM · WhatsApp

Knowledge base assistant

Assistant that answers questions using the company's internal documents.

Python · RAG · LLM

Automated reports

A workflow that gathers data from several systems and sends ready-made reports every week.

n8n · APIs · Google Sheets

HOW WE WORK

From first contact to delivery, no surprises

1

Conversation

A no-obligation conversation to understand your business, the problem you want to solve and the result you expect. We look at your processes and tools to find where technology makes the biggest impact.

2

Proposal

You receive a clear proposal with scope, stages, timelines and investment. Before any work starts, you know exactly what will be delivered, when and how much it will cost.

3

Delivery

Development in short cycles, with frequent versions for you to test and give feedback. After launch, we monitor, adjust and provide support so the solution keeps evolving.

WHY VIDAL TECHNOLOGIES

What you gain by working with us

Tailored to your business

No generic solutions: every project starts from your processes and goals.

Clarity before we start

Scope, timelines and investment defined in the proposal, with no hidden costs.

You follow every step

Deliveries in short cycles, with versions to test and give your feedback.

Support after delivery

Monitoring, adjustments and continuous improvement after the solution goes live.

NEXT STEP

Have a project in mind?

Tell us what you need. The first conversation is free of obligation and you will get the next steps.
